Environmental Health Section
2785 White Bear Avenue, Suite 350
Maplewood, MN 55109-1320
651.266.1199

The Saint Paul – Ramsey County Department of Public Health will receive a duplicate copy of results from each radon test. The results are public information as described in the Minnesota Government Data Practices Act. Results must be made available to anyone who might request them. If you prefer that this information not be made available, the Department can refer you to other sources for a radon test kit. The other sources may be more expensive. The Department will use the test results in summary evaluations of radon levels by zip code throughout Ramsey County and to provide technical and educational assistance to residents with radon levels above the levels recommended by the US EPA.
